PROFESSIONAL SKILLS
(In place of listing professional experience, a functional resume allows you to group your experience, skills, and accomplishments under a specific skill heading. As the example below shows, each heading lists 5-7 bullets that show your experience in those key areas. Each bullet beings with an action verb).

Leadership & Training
- Project leader of the Z-Mart Store system, including application architecture and database design in VB and SQL
- Technical Lead in the integration of a third-party point-of-sale system into the Z-Mart Store system
- Technical trouble-shooter for all store systems
- Guided developers in understanding the business deliverables and the application of tools and techniques appropriate for the needs of the project
- Trained Help Desk staff in the areas of network maintenance and trouble-shooting systems and applications
- Performed on-site training to payroll auditors while at Revenue Canada (across all Canadian cities)

Software Development
- Analyzed, designed, coded, tested, and implemented many business processing and analytical systems using appropriate tools
- Authored numerous business documents, technical analysis documents, and quality assurance plans, as part of the overall development process of new systems
- Converted a Retail Back Office system from Clipper to VB and SQL on Windows NT platform
- Developed a PC-based Inventory Tracking system to manage off-site inventory
